The Power to Surprise

Kia is the newest and most exciting force of change in the automotive world and we are ready to change the way you feel and think about driving. More than just a promise, we are committed to making driving a true pleasure for customers across the globe. With youthful and dynamic styling and the latest in advanced technologies, Kia cars are turning heads the world over with the power to surprise. From the Picanto to the Mohave, Kia offers a full lineup of sedans, SUVs and MPVs that are not only practical and stylish but downright exhilarating to drive. Keep your eyes on Kia because our best has yet to come.

About Kia Motors Corporation

Kia Motors Corporation (www.kia.com) – a maker of world-class quality vehicles for the young-at-heart – was founded in 1944 and is Korea's oldest manufacturer of motor vehicles. About 3 million Kia vehicles a year are produced at 14 manufacturing and assembly operations in five countries which are then sold and serviced through a network of distributors and dealers covering around 180 countries. Kia today has over 51,000 employees worldwide and annual revenues of over US\$47 billion. It is the major sponsor of the Australian Open, official automotive partner of FIFA – the governing body of the FIFA World Cup™ – and official partner of the UEFA Europa League – the world's largest professional club football competition. Kia Motors Corporation's brand slogan – "The Power to Surprise" – represents the company's global commitment to surprise the world by providing exciting and inspiring experiences that go beyond expectations.

"I WANT ADVENTURES THAT END ON A HIGH NOTE."

Rugged capability. That's what makes an SUV worth its salt. The all-new Kia Telluride is an all-access, all-weather SUV that seats up to eight in roomy luxury. It's also smart about what it's getting into. Dial into the Snow terrain mode and upshifts will come sooner, so your wheels don't spin out. Or lock the differential for the tough stuff. Even for day-to-day driving, the Telluride offers four tailored drive modes. If you're ready to go big, read on.

A POWER REAR LIFTGATE offers easy access to class-leading cargo space. Seats fold flat to fit big items. TOWING CAPACITY ranges up to 5000 lbs, and the SELF-LEVELING REAR SUSPENSION automatically adjusts ride height according to vehicle load, for stability. TRAILER STABILITY ASSIST detects trailer oscillation and corrects swing through torque reduction, individual wheel braking, or both.

IT'S ABOUT WHAT YOU BRING TO THE JOURNEY

The Telluride offers you more ways to bring your gear and your companions along for the trip, as well as the technology to help you stay in control and out of trouble. While the safety and stability features are working nonstop behind the scenes, dynamic performance features make the drive itself as relaxed or as invigorating as you desire.

OUTWARDLY CALM. INWARDLY SERENE.

Advanced engineering helps keep the ride smooth and the driver confident. Fourwheel independent suspension, with multiple shock-reduction dampers and vertical rear shocks, help isolate the quiet cabin from bumps and vibrations. An exceptionally rigid body, paired with agile, responsive steering, helps make the Telluride nimble to maneuver. And as problems pop up out in the real world, the ADAS and stability control processors help eliminate them in real time.

DRIVE MODES AND AWD

In normal driving, the drive mode determines how power is distributed. Eco and Smart modes are front-wheel drive. Comfort and Snow modes deliver 20% of drive to the rear wheels. Sport mode splits the power 65/35, front-to-back. Lock mode delivers power evenly to all four wheels. AWD processors adjust torque flow to each wheel based on road conditions and driver input, including turning and braking.

8-SPEED TRANSMISSION

A durable 8-speed automatic transmission with coasting control works in harmony with the engine, and the available AWD system, to deliver smooth shifts and gear selections that best match the driving conditions.

Lambda 3.8 V6 GDi engine

The 3.8-liter, Atkinson-cycle V6 generates up to 295 hp, with peak torque of 36.2 kg/m. Because CVVT is engaged over a wider range of engine speeds, fuel economy is outstanding.

JUST THE RIGHT MIX OF FORCE AND FINESSE

The Telluride gives you the power to join rushing traffic, or to escape from civilization completely and conquer rugged back roads. And it does it so efficiently, you can go a long way between refueling stops. There is ample power to pull a standard 5,000 lb. Class III trailer, so adventures can continue from the water's edge.

ELEGANTLY SIMPLE INSTRUMENTATION

Drivers will find the design of the comfortable cockpit to be polished and controlled. The horizontal arrangement of instruments and design elements, including a floating AVN screen, is clean and uncluttered. Wood-pattern trim provides a clubhouse feel. The sculpted handles of the console hint at bracing adventure.

10.25" WIDE-TFT LCD DISPLAY

Above the center console, the 10.25", high-resolution display presents data for navigation and audio, as well as the rear view monitor and parking guidance. The customizable screen can be split into two views at once, and you can pinch zoom, in and out, on maps.

USB CHARGE PORTS IN EVERY ROW

There are six USB charging ports in the Telluride, with at least two in-seat ports available in every row.

ROOF-MOUNTED REAR CLIMATE CONTROL AND 360° VENTS

First-in-class roof-mounted rear-seat climate controls let people in the second row adjust the temperature, strength, direction, and mode of airflow that reaches them. Diffusible 360° air vents in the roof let rear passengers stop, reduce, or redirect airflow.

WIRELESS SMARTPHONE CHARGING

The charging pad at the front of the center console allows you to charge a compatible mobile phone wirelessly. An audible alert lets you know if you've left the phone behind.

SOLID AND SUMPTUOUS DESIGN

At once rugged and welcoming, the interior decor features sturdy trim elements and brushed metal and matte-finished wood accents, a firm counterpoint to the abundant soft Nappa leather upholstery. Indirect mood lighting, from under the dash trim, adds a glamorous touch after dark.

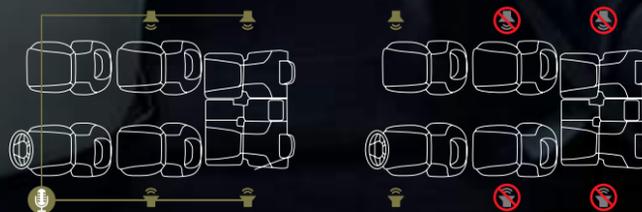

EASY-ACCESS REAR SEATING

Telluride makes it easy to get in and out of the 3rd row of seats. Access is particularly manageable with reclining, 2nd-row captain's chair seats (shown) that fold and slide forward at the push of a button. In fact, both rear seat rows fold flat, unfold, and even recline, together or split, at the touch of a button. There are ISOFIX anchors for up to three child seats.

DRIVER TALK MODE / QUIET MODE

The audio system's in-car Driver Talk intercom lets the driver speak with back-seat passengers without shouting or turning around. A Quiet Mode switches the audio system from full-interior sound to a reduced-volume, front-seat only mode, to facilitate naps or discussions in back.

BRING YOUR OWN WIDE-OPEN SPACE

The spacious interior seats seven or eight comfortably with unmatched legroom, in three rows of reclining seats. The firm, comfortable seats are trimmed with double-stitched, quilted and extra-padded Nappa leather upholstery. A dual sunroof, with a sliding front, brings light and breezes to every seat.

Kia Drive Wise
LANE-SENSING TECHNOLOGIES

When the turn signals are on, BLIND-SPOT VIEW MONITOR (BVM) gives you a live feed of your blind spots in the instrument cluster screen, and includes visual alerts. If you start to change lanes while an object is detected, BLIND-SPOT COLLISION-AVOIDANCE ASSIST-REAR (BCA-R) can help maintain your previous course. A center SURROUND VIEW MONITOR (SVM) offers a zoomable overhead representation of your vehicle and its surroundings.

TECHNOLOGY THAT EVERYONE CAN LIVE WITH

Kia's DriveWise is a robust technology platform that employs the latest sensing, processing, and display technology to improve how you interact with your Kia, with traffic, and with the world around you, all in order to make driving safer and less stressful. The Telluride is a showcase for these advances, with features that help you stay aware of your surroundings, and even take decisive actions to protect you.

SAFE EXIT ASSIST (SEA)

Using radar, SEA detects cars approaching from the rear and cautions passengers who may intend to exit the vehicle. SEA will even override a driver's Electronic Child Safety Lock settings to keep the rear doors locked until the approaching vehicle has passed.

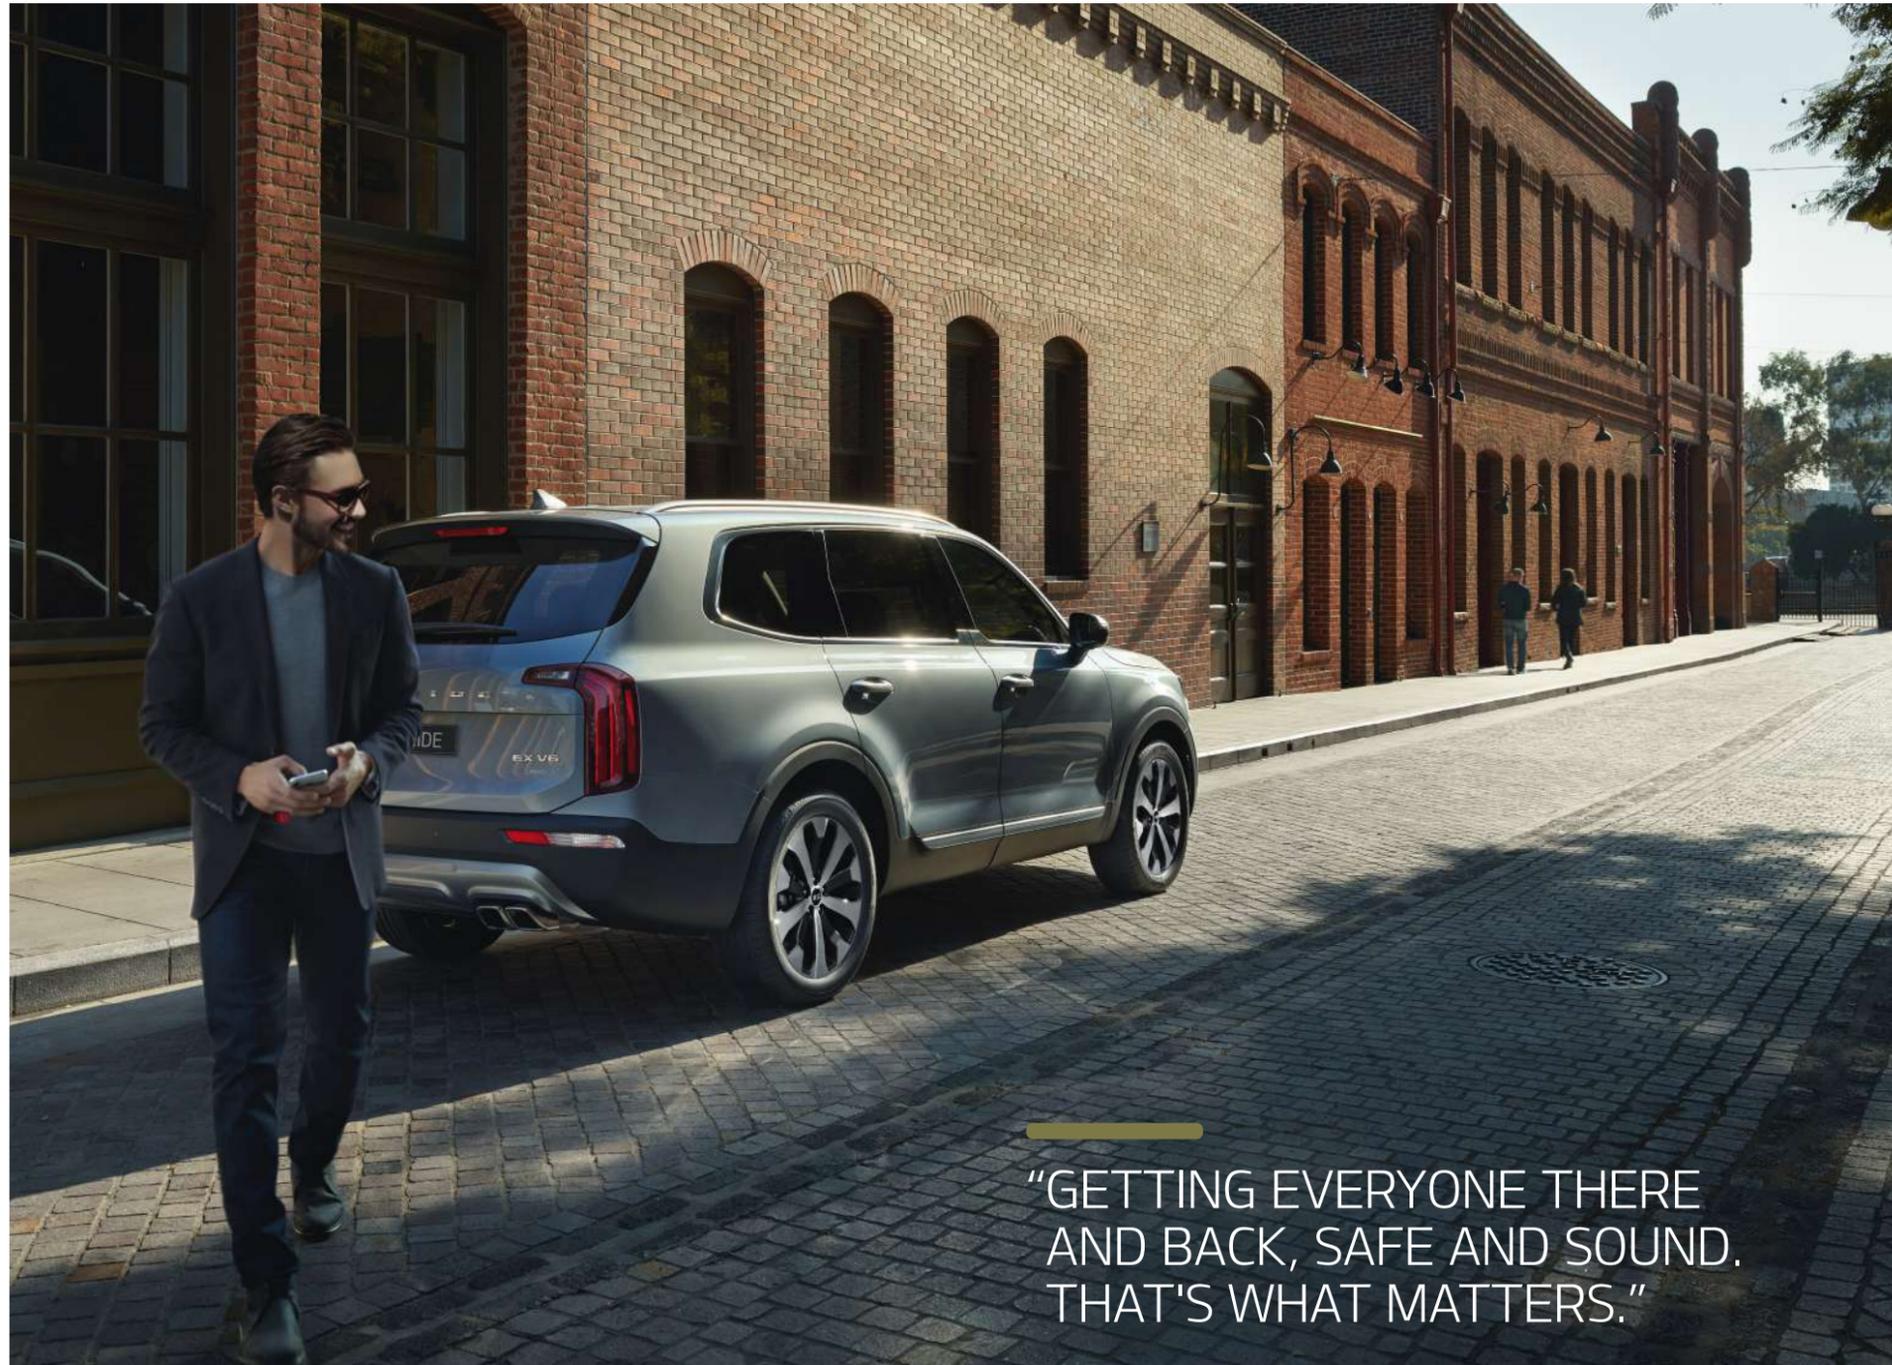

HEAD UP DISPLAY (HUD)

To allow the driver to see key information while continuously watching the road, HUD projects an image on the windshield itself. Equivalent to a 9.7-inch screen, it shows vehicle speed, driving and safety alerts, and navigation cues, with LCD sharpness.

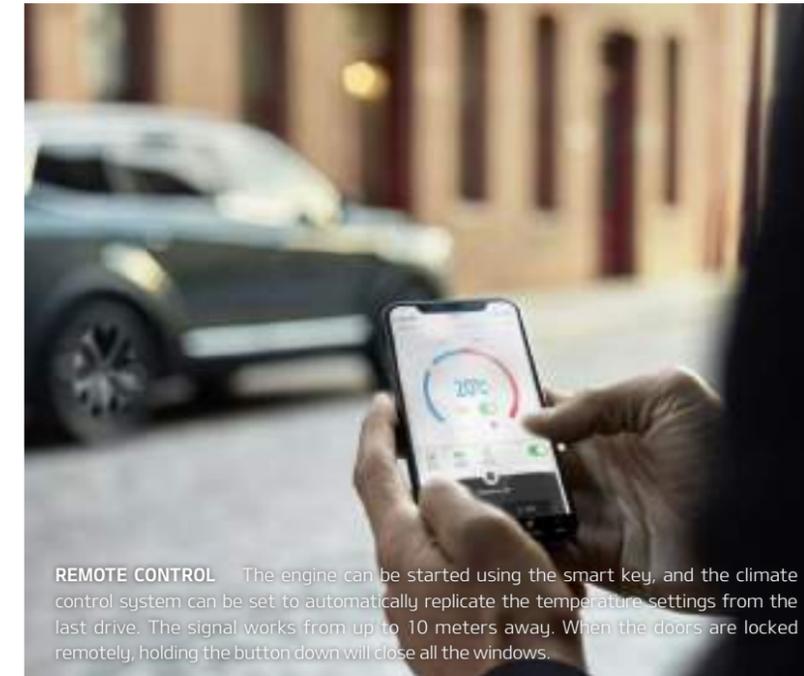

FORWARD COLLISION-AVOIDANCE ASSIST (FCA)

When the risk of a collision in the front is detected, the driver is warned and, if necessary, FCA with Pedestrian Detection may actually apply the brakes, to help reduce the effects of a possible impact.

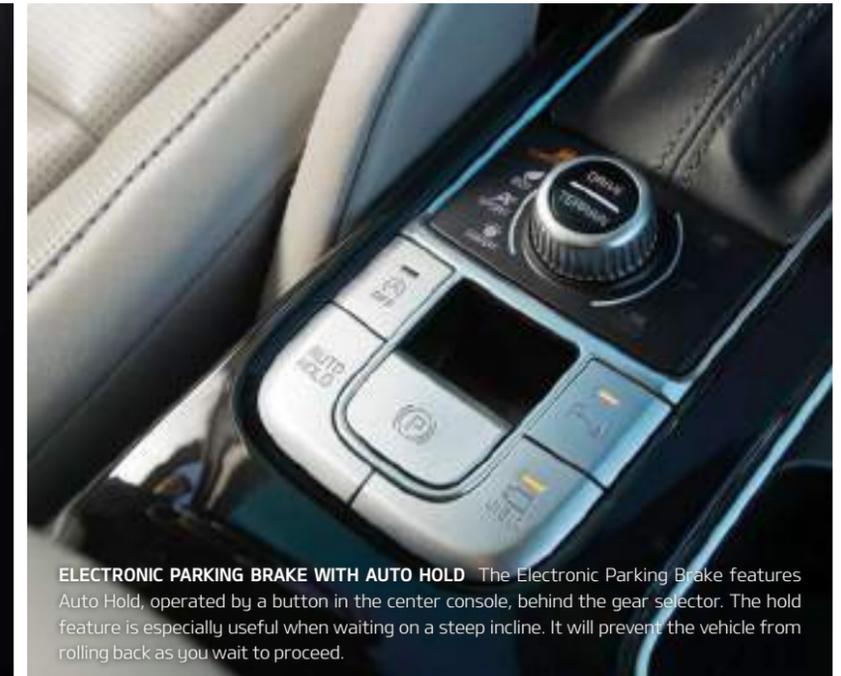

“GETTING EVERYONE THERE
AND BACK, SAFE AND SOUND.
THAT'S WHAT MATTERS.”

REMOTE CONTROL The engine can be started using the smart key, and the climate control system can be set to automatically replicate the temperature settings from the last drive. The signal works from up to 10 meters away. When the doors are locked remotely, holding the button down will close all the windows.

ELECTRONIC PARKING BRAKE WITH AUTO HOLD The Electronic Parking Brake features Auto Hold, operated by a button in the center console, behind the gear selector. The hold feature is especially useful when waiting on a steep incline. It will prevent the vehicle from rolling back as you wait to proceed.

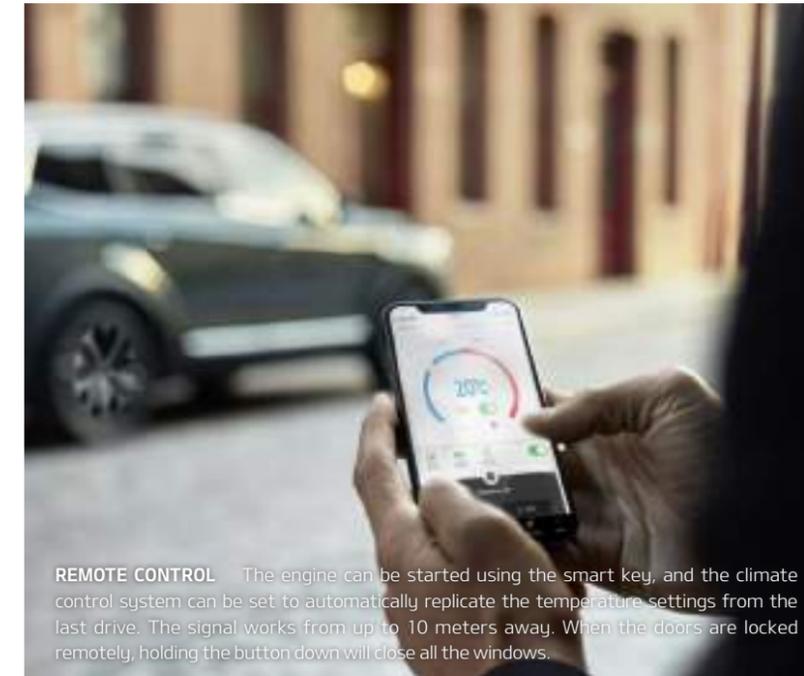

VENTILATED SEATS Ventilated front seats use fans, heating elements and small perforations to help the driver and front passenger get and stay comfortable. Ventilated and heated captain's chair seats are also available for the second-row seats, a first among SUVs in this class.

HARMAN KARDON SOUND SYSTEM The Harman Kardon premium sound system transforms a ride in the spacious cabin into an auditory adventure. Its external amplifier drives 12 precisely positioned speakers, including an OCS-type subwoofer that generates bass output markedly superior to that of a conventional enclosed subwoofer.
